

SUBJECT INDEX

The alphabetically ordered subject index contains entries based on the most important subjects mentioned in the title and abstracts. The chemical names used in the index terms are chosen on the basis of the nomenclature recommended by the International Union of Pure and Applied Chemistry. Organic compounds are indexed at the parent compounds followed by the substituent groups; esters and salts of organic acids are indexed under the names of their acid constituents. As far as possible, dyes are indexed under the Colour Index names; the names given to enzymes are those recommended by the International Union of Biochemistry; drugs are indexed at their official B.P. or B.P.C. names or the Approved Names recommended by the British Pharmacopoeia Commission; and pesticides are indexed at the names recommended by the British Standards Institution.
